AND THE PROPERTY OF THE PROPER

FAMILY PHYSIC.

There has long existed a public demand for an effective pergative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of the virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills—one which should have mone of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortuniate for the patient hitherto that almost every purgative medicine is nerimonious and irritating to the bowels. This is not. Many of then produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from them. These pulls produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiclously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the complaints which have been speedily cured by them, we may mention Liver Complaint, in its various forms of Jaundece, Indigestion, Langnor and Loss of Appetite, Listlessness, Irritability, Bilious Headlache, Bilious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient, they afford prompt and sure relief in Costiveness, Pires, Colic, Dysentery, Humors, Scrof rula and Scurry, Colds with soreness of the body, Ulcers and impurity of the blool; in short, any and every case where a purgative is required.

They have also produced some singularly successful cures in Rhomatism, Gut, Drupsy, Gravel, Ervspelas, Polpitation of the Heart, Pains in the Back, Stomach, and Side. They should be freely taken in the spring of THERE has long existed a public demand for an

though no serious derangement excits; but unnecessary dosing should never be carried too lat, as every purgative medicine reduces the strength, when taken to excess. The thousand eases it which a physic is required cannot be enumerated here, but they suggest themselves to the reason of every body; and it is confidently believed this pill will answer a better purpose than any thing which has hitherto been available to mankind. When their virtues are once known, the public will no longer of a longer than any thing which has hitherto been available to mankind. For the raphi Care of COUGHS. COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

This remedy has won for itself such notoriety from its cures of every variety of pulminary disease, that it is entirely unnecessary to recount the evidences of its virtues in any commanity where it has been employed. So wide is the field of its usehas been employed. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lyings by its use. When once tried its superiority over every (ther medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what autilote to employ for the distressing and dangerous affections of the pulmonary organs which are incident to our climate. And not only in formilable attacks upon the lings, but for the milder varieties of Colds, Coughs, Hoarsenbes, &c.; and for Children it is the pleasantest and safest medicine that can be obtained.

As it has long been in constant use throughout

As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best that it ever has been, and that the genuine article is sold by— Total Architecture 1 A
